

HEDGE

Print specifications

General

REQUIREMENTS

- Artwork must be supplied as a high resolution PDF, we recommend the PPA's pass4press guidelines
- All images must be embedded, at a minimum of 300dpi
- Only CMYK colours are allowed: no spot colours, no RGB, no LAB
- All fonts must be embedded
- Artwork must be flattened
- Ink limit is 300%

- Extended guidelines and job options for PDF creation can be found under the PPA's **pass4press** section.

ppa.co.uk/resources/resources/ppa-production-resources

- The recommended colour profiles specified below are available from the ECI's website.

eci.org/en/downloads

- Please follow all specifications carefully. While every effort is made to ensure that all advertisements are reproduced to the highest standard Threadneedle Media will not accept responsibility for the reproduction of advertisements that have been supplied without a printed proof, nor can it when the PDF artwork has not been supplied to our specification.

Delivery

REQUIREMENTS

- Artwork should be delivered by email to production@hedgemagazine.co.uk or via web transfer.
- You must notify your account manager of delivery via email.

- DropBox, Google Drive, OneDrive and WeTransfer are all acceptable.
- For email delivery a maximum file size of 20MB applies.

production@hedgemagazine.co.uk

Colour

REQUIREMENTS

- Ink limit - 300%.
- Cover: please use the ISO Coated v2 300% (ECI) colour profile for proofing.
- Internal: PSO Uncoated ISO12647 (ECI) colour profile for proofing.

- HEDGE uses uncoated paper stock internally and coated paper on its cover.

Print specifications

Dimensions

DOUBLE PAGE SPREAD

- **Trim** 460mm w x 285mm h
- **Bleed** 466mm w x 291mm h
- **Text area** 444mm w x 269mm h

When supplying a DPS artwork allow a 6mm gutter / double image allowance (3mm per page). This allowance should be on the spine edge and within the trim width. A DPS should be supplied as two single pages, marked LHP and RHP

QUARTER PAGE

- **Trim** 90.5mm w x 125.5mm h
- **Bleed** n/a
- **Text area** 80.5mm w x 115.5mm h

No bleed is required as a white margin is included on all sides

FULL PAGE

- **Trim** 230mm w x 285mm h
- **Bleed** 236mm w x 291mm h
- **Text area** 214mm w x 269mm h

ESSENTIALS

- There are 8 Essentials premium listings per page.
- Supply a high resolution image plus 50 words including contact details. Please contact the office for production. Final copy must conform to our style guidelines.

HALF PAGE

- **Trim** 207mm w x 130.5mm h
- **Bleed** n/a
- **Text area** 197mm w x 120.5mm h

No bleed is required as a white margin is included on all sides

Online specifications

General

- Advertising packages may include online components. These are run on HEDGE's sister's site squaremile.com and its related platforms.

REQUIREMENTS

- Completed online artwork must be submitted at least a week before it is scheduled to ensure that it meets our specifications.
- JPG, PNG, HTML5 file formats accepted.
- For website artwork, the file size should be kept under 1MB (rich media may provide streamed content above this limit).
- For newsletter artwork, maximum file size is 300KB.
- We highly recommend keeping the file size even smaller where possible in order to ensure artwork has maximum exposure under restricted bandwidth conditions (eg. newsletters).
- Please note: campaigns not providing a full set of leaderboards and MPUs will be unable to reach our full audience across all devices.

Rich Media

- Any HTML5 artwork must have an initial/polite load size under 100k, and ideally progressively load on user interaction.
- Flash artwork is no longer supported. In some instances it can be converted to HTML5 using tools widely available on the web but you are required to test the output thoroughly before submission.
- Frame rate must be no more than 20fps.
- Ads must not loop more than three times or exceed a total of 30 seconds animation time.
- No host-initiated audio is permitted. Audio must be user-initiated by clicking within the banner and must contain clearly visible "Mute" and "Stop" functionality.
- Video can be host or user-initiated.

Colour

- RGB colour only
- Target sRGB IEC61966-2.1 for proofing

Delivery

REQUIREMENTS

- Artwork should be delivered by email to production@squaremile.com or via web transfer.
- You must notify your account manager of delivery via email.
- DropBox, Google Drive, OneDrive and WeTransfer are all acceptable.
- For email delivery a maximum file size of 20MB applies.
- Please contact your account manager to confirm receipt of artwork on +44 (0) 20 7819 9999.

production@squaremile.com

Squaremile.com specifications

Online campaigns

- We support HTML 5 animated and interactive artwork or PNG/JPG static artwork.
- Static artwork can support HiDPI displays. If you would like to take advantage of this feature, please provide an additional set of artwork at 2x these dimensions:

EPIC PARALLAX - [SEE NEXT PAGE FOR DETAILS AND EXAMPLES](#)

Backgrounds:

- Large displays: 1920px w x 1080px h
- Medium displays: 970px w x 450px h
- Small displays: 728px w x 450px h

Billboards:

- Large displays: 970px w x 250px h
- Medium displays: 728px w x 250px h
- Small displays: 300px w x 250px h

All sizes must be included

LEADERBOARDS

- Large: 728px w x 90px h
- Medium: 468px w x 60px h
- Small: 320px w x 50px h

All three sizes must be included

What to include

- **Run of Site (ROS) campaigns** should include all Leaderboard sizes and the MPU size (though we recommend also including the Half Page and Double MPU sizes).
- **Homepage Takeover (HPTO) campaigns** should include 3 Epic Parallax creatives, along with at least one instance of all Leaderboard sizes and the Half Page, Double MPU and MPU sizes.
- **Click-through link** you should include the destination URL, as well as the tracking link (where applicable). Please include the destination URL even if you are including a tracking link so that the link can be tested before flight.

HALF PAGE

- 300px w x 600px h

DOUBLE MPU

- 300px w x 500px h

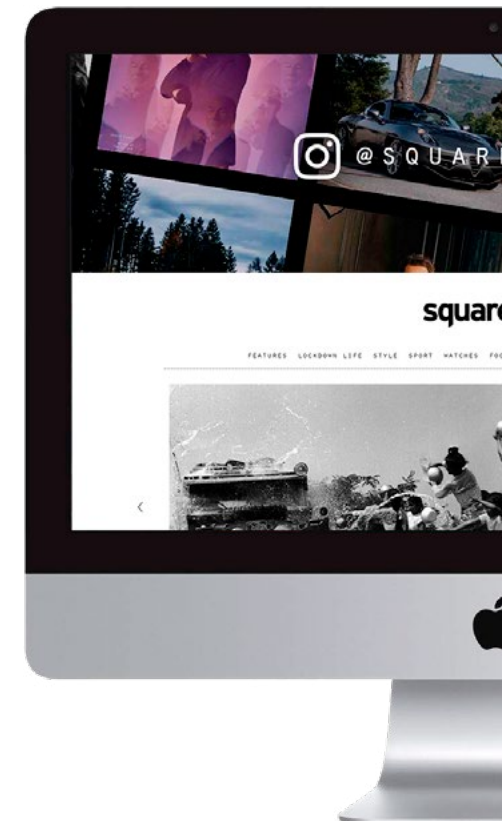

MPU

- 300px w x 250px h

Notes

- Static artwork may be compressed for performance optimisation.
- We recommend additional artwork variants of the MPUs for maximum impact.

Epic Parallax artwork extended specifications

Responsive design

- The Epic Parallax artwork ad slots are designed to respond in order to display effectively on any screen. This means it's important to test the template artwork with a range of different screen sizes to understand how the artwork behaves. Remember that most users will view your artwork on a handful of the most popular devices and screen sizes - so prioritize these.
- You should include artwork for:
 - Large displays: targeting mostly for desktop and larger laptop screens
 - Medium displays: targeting mostly tablet, phablet and small laptop screens
 - Small displays: targeting mostly standard and small mobile screens

DYNAMIC SCROLLING

Backgrounds:

- Large displays: 1920px w x 1080px h

Billboards:

- Large displays: 970px w x 250px h

Dynamic Scrolling

- The Epic Parallax artwork on large displays dynamically shifts the Background as the user scrolls, to give the illusion of depth and draw the eye naturally without being overtly intrusive to the browsing experience.
- It is particularly effective to have your Background's focal point off screen initially and then move into view as the user scrolls.

Static scrolling

- On medium and small displays, dynamic scrolling of the Background is disabled to conserve battery life on mobile devices - so the Background and foreground Billboard move together.
- The artwork is responsive so the Background can be cropped depending on some screens and the portion obscured by the Billboard will differ.

STATIC SCROLLING

Backgrounds:

- Medium displays: 970px w x 450px h
- Small displays: 728px w x 450px h

Billboards:

- Medium displays: 728px w x 250px h
- Small displays: 300px w x 250px h

Notes

- The billboard is always full viewable so CTAs should be placed on it.
- Billboards can include transparent elements. Use the PNG 24-bit format to enable this. Because they're transparent you don't have to cover the whole area with your CTA. Photographic billboards are better supplied as JPG files.

Example

- Please use this link to see how the template artwork displays on a variety of screens (copy and paste the link if the button is locked in your PDF reader)

squaremile.com/epic-parallax/example/

Newsletter specifications

Newsletter campaigns

- We support static artwork ONLY for newsletter campaigns, in PNG, GIF or JPG format.
- Maximum file size 350kb but the smaller the file size, the quicker the ad will load in low-bandwidth scenarios.
- Static artwork can support HiDPI displays. If you would like to take advantage of this feature, please provide an additional set of artwork at 2x these dimensions:

SUPER MPU

- Standard definition - 320px w x 640px h
- High definition - 640px w x 1280px h

Super MPU artwork is scaled to an effective display size of 300px w x 600px h on desktop and full width on mobile to support hi-dpi screens.

Maximum file size 350kb

What to include

- **Static artwork** in PNG, GIF or JPG format at either standard or high definition dimensions.
- **Click-through link** you should include the destination URL, as well as the tracking link (where applicable). Please include the destination URL even if you are including a tracking link so that the link can be tested before flight.

Notes

- We recommend additional artwork variants of the MPUs for maximum impact.
- Static artwork may be compressed to ensure high performance delivery.
- Tracking pixels are not supported.
